

## PLEASS ENVIRONMENTAL POLICY

As a water bottling company and an eco-adventure park (among other things), we know how important it is to protect the environment on which our business model is based. As individuals, we see how human activities can impact Nature.

As both, we are confident that taking care of Nature today will ensure that we and our children will be able to enjoy its benefits and beauty.

We believe that everyone has a role to play to change things in order to build a better and safer future for us and the generations to come.

Therefore, PLEASS Beverages Ltd is committed to reducing in every possible way its ecological footprint. To do so, we have already developed a Sustainability Action Plan for all our sites and staff which allows us in one single document to list all the strategies we can undertake to reduce our impact on Nature. This Sustainability Action Plan is based on the principles here beside and is available at [www.pleass.com/greenpleass](http://www.pleass.com/greenpleass)

*These ten principles were created by WWF and Bioregional, find out more on [www.oneplanetliving.org](http://www.oneplanetliving.org)*

We are operating from, and mainly for Fiji, where we aim at leading a strong Corporate Social Responsibility movement among companies but also NGOs and Government to improve practices and regulations. We believe that the best way to do so is to lead by example and that's why everything we will do in order to reduce our ecological footprint will be made available to other companies.

Where others may see competition, we see collaboration as we know that this is the only way to address the challenge that we are all facing today.
